

Version 2.0	Requirement Specification savepaper.at	
Matthias Gerstl, BSc		

Project scope

CSS & HTML customization

Budget

Please let me know first the expected costs of the project.

Content

You will find all necessary files in [my drive](#). To enhance workflow all screenshots are linked to my google drive for enlargement.

Task index

- 1) Reduce distances of "Vorteile"-row
- 2) Check & correct section ID

Migration of new section

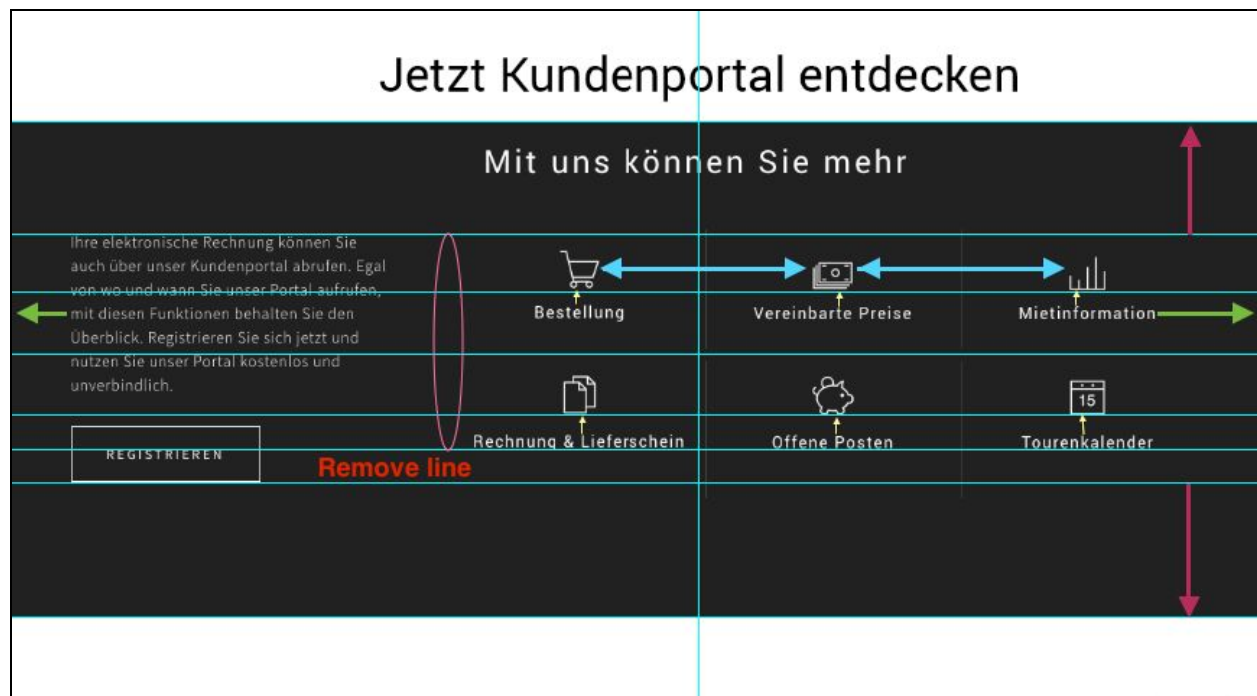

As you know savepaper.at is active. I registered today the domain for the new landing page "testal.at", so I am looking forward to get the domain confirmed on thursday. This means the migration of the new section has to happen on thursday. (Because the section on savepaper.at is targeting to the new landing page testal.at, what I do is I want to "connect" the customer journey)

Actually I have build the new section at [Main Homepage 1.0 -push kundenportal](#) so please customize the section there and when I have migrated the testal.at page to the new domain we will publish the new section "Jetzt Kundenportal entdecken" on savepaper.at.

If anything is unclear, feel free to contact me.

Task description

1) Insert new section “Jetzt Kundenportal entdecken” [valid for savepaper.at]

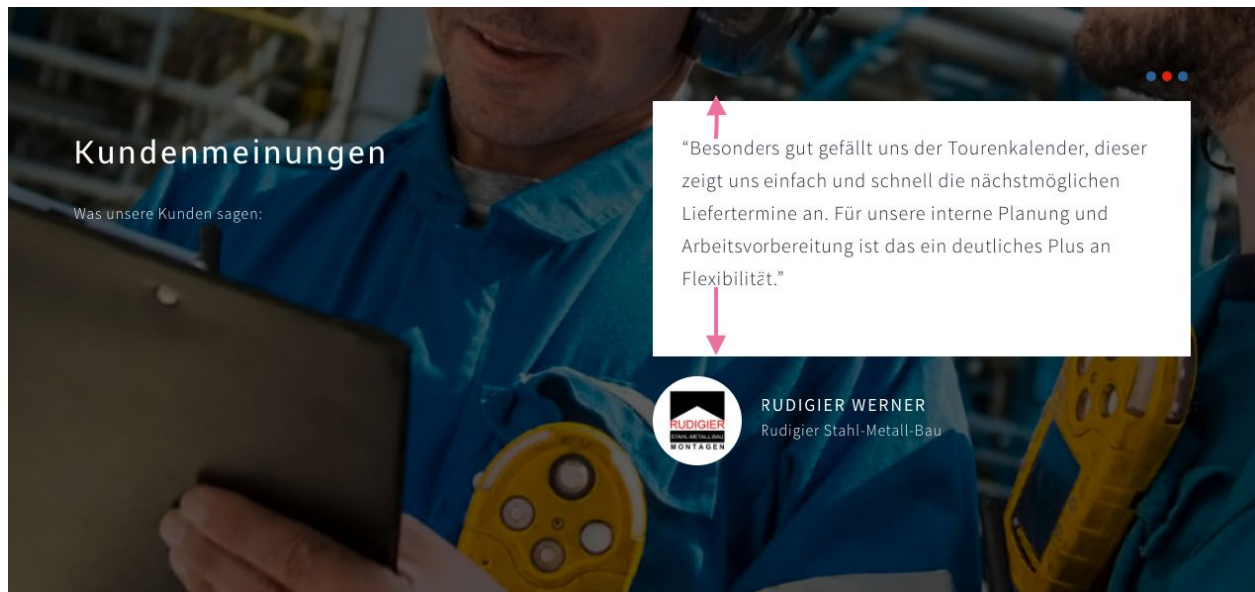

[Enlarge image](#)

Expected actions:

- Add new headline “Jetzt Kundenportal entdecken”
- Place headline “Mit uns können Sie mehr” aligned to the center
- Same color of arrow = same distance (feel free to choose your own distance)
- Reposition icons and sub-headlines (make sure distance of sub-headline & icon is homogenous)
- Remove dividing line (pink marked area)
- In case the description text of the icons doesn't fit with repositioning, you can move the button “Registrieren” down
- Make sure animation works like:
 - (1) “Mit uns können Sie mehr” headline - fadeIn
 - (2) “Ihre elektronische Rechnung...” + “Registrieren”-Button textblock fadeInRight
 - (3) 1st-row icons - fadeInUp
 - (4) 2nd-row icons - fadeInUp
- Responsive display - sort parts:
 - (1) Icons + sub-headlines
 - (2) Textblock
 - (3) Button

2) Align testimonial comment to horizontal center [valid for testal.at]

[Enlarge Image](#)

Expected actions:

- Make sure distance is on top & at bottom homogenous
